

GENERAL CATALOG AND PRODUCT SCHEDULE

Meter Mounting Equipment

www.talonmetering.com

Introduction

Welcome to the Talon utility products catalog and specification guide. This publication is meant to serve as a guide to the various Talon meter socket product families while providing you with a listing of our most common catalog numbers for each family. Only a small percentage of our total offering is listed in this catalog so if you don't see what you are looking for please keep in mind that all of our sockets can be customized to fit your specific needs.

The pages of this catalog will guide you in creating your own catalog number if there isn't one listed to fit your needs. If you need help our network of utility distribution and sales team will be happy to assist you in determining the right socket for you. We've made every effort to make this catalog easy to use and understand. A definition for the headings on the catalog charts is listed to the right. This will assist you in the selection of your meter socket.

Talon has been the standard for quality and innovation for meter mounting equipment for over half a century. The heart of our offering continues to be the HQ lever bypass socket. The basic design of this socket has not changed since its original inception in 1956 making this a solid, time-proven design. We continue to offer the HQ at a competitive price even when faced with lower cost and

lower quality competition. The bypass blade for every HQ is rated for 320 amps making every one of our sockets "Heavy Duty". Our K base products continue to offer the same dependability and cost advantages for "extended range" metering. The residential socket line continues to grow daily as we continuously add or update our products for an ever-changing market.

We hope you find this catalog useful and easy to use. Thank you for your continued support.

Definitions:

Cover Style – Specifies the cover type ring or ringless

Service – UL listed entry points for line side conductors

Terminal – Wide range for line and load lugs

Connector Bypass – Type of bypass installed, if any

Hub Opening – RX = Small base, 2.5" max.;

HD = Large base 4" max.

Barrel Lock – Barrel lock KO and bracket if installed

5th Jaw Catalog Number – Shows if installed or catalog number to order

RX = Small hub: 3/4" -- 2-1/2"

HD = Large hub: 3" -- 4"

Type UAT1 135A Residential Meter Mounting Equipment

Common Features

- 135A continuous duty rated
- Quad ground on all devices (2) #14-2/0 and (2) #14-#2
- Lay-in 2/0 max lugs
- Steel or aluminum construction
- Glass filled polyester block construction
- Ring or ringless styles
- Horn or no bypass

Consult the factory for other available options such as, but not limited to insulated 5th terminals, alternate jaw guide configuration, alternate hasp material and special labeling.

General Information:

Capacity: 135 ampere continuous, 600 volts a.c.

Application: Single phase, 3 wire, self-contained convertible to 5 terminal.

Enclosures: All enclosures shown here are ringless, NEMA Type 3R. All enclosures are available in either 16 gauge painted steel .063 aluminum in natural finish. (For painted aluminum enclosures, consult factory.)

Block Assembly: Block assemblies are arc and track resistant thermoset.

Terminals: Terminals are lay-in style, tin-plated, extruded aluminum 6061-T6. Blade and external hex types available.

UL: All sockets are UL listed unless otherwise indicated.

ANSI-C12.7: All sockets meet or exceed ANSI-C12-7 standards.

Hubs: Hubs conform to ANSI standard. 2.5" hub maximum.

Barrel Lock Prov.: Includes bracket and knockout.

① Includes stainless steel latch and hasp.

② Includes cardboard meter opening cover.

③ Includes concentric 7/8" and 7/16" barrel lock K.O.

④ Cover attaches via 2 brackets with screws behind meter.

⑤ Cover attaches via slider latch behind meter.

⑥ Catalog numbers listed include KO and bracket for barrel lock.

⑦ De-rated to 160 amps continuous.

⑧ De-rated to 125 amps continuous.

⑨ KO's match UAT4.

Consult the factory for other available options such as, but not limited to insulated 5th terminals, alternate jaw guide configuration, alternate hasp material and special labeling.

General Information:

- Capacity: 200 ampere continuous, 600 volts a.c.
- Application: Single phase, 3 wire, self-contained convertible to 5 terminal.
- Enclosures: All enclosures shown here are ringless, NEMA Type 3R. All enclosures are available in either 16 gauge painted steel .063 aluminum in natural finish. (For painted aluminum enclosures, consult factory.)
- Block Assembly: Block assemblies are arc and track resistant thermoset.
- Terminals: Lay-in style, tin-plated, extruded aluminum 6061-T6.
- UL: All sockets are UL listed unless otherwise indicated.
- ANSI-C12.7: All sockets meet or exceed ANSI-C12-7 standards.
- Stud-Type: Optional stud-type connectors are available, consult factory.
- Hubs: Hubs conform to ANSI standard. 2.5" hub maximum.
- Barrel Lock Prov.: Includes bracket and knockout.

Consult the factory for other available options such as, but not limited to insulated 5th terminals, alternate jaw guide configuration, alternate hasp material and special labeling.

General Information:

Capacity:	200 ampere continuous, 600 volts a.c.
Application:	1 phase, 3 wire wye or 3 wire delta services using self-contained Class 100 or Class 200 meters.
Enclosures:	Constructed of 16 gauge galvanized steel with polyester powder finish, suitable for indoor or outdoor installation. Also available in aluminum and different sizes upon request. All boxes have ringless covers. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester mounted on metal baseplate. High strength, arc and track resistant.
Safety Shield:	Track resistant polycarbonate insulating safety shield provides protection from accidental shorts and shocks.
Terminals:	Lay-in type with dome point screw. Conservatively rated at 200 amperes, terminals will accommodate conductors from #8 to 350 MCM copper or aluminum.
Hubs:	Single, removable, gasketless hub; cover plate, or no hub. Hubs and cover plate are interchangeable.
UL:	These mounting devices are listed by UL for use on continuous loads up to 200 amperes and 600 volts.
ANSI-C12.7:	All sockets meet or exceed ANSI-C12-7 standards.

General Information:

Capacity: 100 and 150 amps continuous.
 Application: Single phase, 3 wire, self-contained convertible to 5 terminal.
 Enclosures: All enclosures shown here are ringless, NEMA Type 3R. All enclosures are available in 16 gauge painted steel finish. (For aluminum enclosures, consult factory.)
 Block Assembly: Block assemblies are arc and track resistant thermoset.
 Terminals: Terminals are lay-in style, tin-plated, extruded aluminum 6061-T6.
 UL: All sockets are UL listed.
 ANSI-C12.7: All sockets meet or exceed ANSI-C12-7 standards.
 Hubs: Hubs conform to ANSI standard. 2.5" hub maximum.
 Barrel Lock Prov.: Includes bracket and knockout.

Product Schedule 416

200A Multi-Position Meter Mounting Devices

General Information:

- Capacity: 200 ampere continuous per position.
- Application: Single phase, 3 wire self-contained, convertible to five terminal.
- Enclosures: All enclosures shown here are ringless. All enclosures are available in either 16 gauge painted steel or .063 aluminum in natural finish. (For painted aluminum or ring-style enclosures, consult factory). All enclosures are NEMA type 3R.
- Bypass: Optional horn-type available. Consult factory.
- Terminals: Wiring terminals are lay-in style tin-plated extruded aluminum 6063-T6 or equivalent.
- UL: All sockets are available with UL label.
- ANSI-C12.7: All sockets meet or exceed ANSI-C12.7 standards.
- 5th Terminal: Order kit 659-0121.

- Hub Options: First character after "-" in catalog number.
- | | |
|--------------|--------------------------|
| A 1" hub | K 2 large openings |
| B 1-1/4" hub | M 2 large CPs |
| C 1-1/2" hub | N Large-to-small adapter |
| D 2" hub | O Small opening |
| E 2-1/2" hub | P No hub opening |

① Includes ground lug 36503, #14-2/0.

② Includes 2 ground lugs.

③ Kit includes new shield and 5th jaw at 9:00. Lead not included.

Product Schedule 420

Type HQ/HQU 4 Terminal Clamping Jaw Lever Bypass

General Information:	
Capacity:	200 ampere continuous, 600 volts a.c.
Application:	Single phase 3 wire self-contained, 4 terminal (convertible to 5 terminal).
Enclosures:	Constructed of 16 gauge G90 galvanized steel and coated with light gray polyester powder coat finish for maximum corrosion protection. Consult factory for alternate .080 aluminum construction. Latches are made from series 300 stainless steel. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester. High strength arc and track resistant.
Bypass:	Lever operated jaw release. Full 200 ampere rating. Moving lever up bypasses meter and releases pressure on meter jaws. Cover cannot be replaced with lever in bypass position.
Terminals:	Types HQ-4G and HQ-4GU are lay-in type with dome point screw. Rated for conductors from #6 to 350 MCM CU/AL.
Hubs:	Single removable gasketless hub, conforms to ANSI C12.7 specifications for interchangeability.
UL:	All units are UL listed.
Safety Shield:	Track resistant polycarbonate insulating safety shield provides added protection from accidental shorts and shocks.
Ground Lug:	Optional ground lug available. Consult factory.
Torque:	Wire connections: 400 in. - lbs.

Product Schedule 421

Type HQ/HQU/HQUW 5 Terminal Clamping Jaw Lever Bypass

General Information:

Capacity:	200 ampere continuous, 600 volts a.c.
Application:	Single phase 3 wire self-contained, 5 terminal. 3 phase, 3 wire when used with isolated neutral.
Enclosures:	Constructed of 16 gauge G90 galvanized steel and coated with light gray polyester powder coat finish for maximum corrosion protection. Consult factory for alternate .080 aluminum construction. Latches are made from series 300 stainless steel.
Block Assembly:	Glass fiber reinforced polyester. High strength arc and track resistant. All enclosures are NEMA type 3R.
Bypass:	Lever operated jaw release. Full 200 ampere rating. Moving lever up bypasses meter and releases pressure on meter jaws. Cover cannot be replaced with lever in bypass position.
Terminals:	Types HQ-5 and HQ-5U are lay-in type with dome point screw. Rated for conductors from #6 to 350 MCM CU/AL.
Hubs:	Single removable gasketless hub, conforms to ANSI C12.7 specifications for interchangeability.
UL:	All units are UL listed.
Safety Shield:	Track resistant polycarbonate insulating safety shield provides added protection from accidental shorts and shocks.
Ground Lug:	Optional ground lug available. Consult factory.
Torque:	Wire connections: 400 in. - lbs.

① Includes ground lug 36503, #14-2/0.
② Includes 2 ground lugs.

③ Painted aluminum.
④ Stainless steel latch and hasp.

Product Schedule 422

Type HQ/HQU 7 Terminal Clamping Jaw Lever Bypass

General Information:

Capacity:	200 ampere continuous, 600 volts a.c.
Application:	3 phase, 4 wire wye or 4 wire delta services using self-contained Class 100 or Class 200 meters.
Enclosures:	Ringless cover. Constructed of 16 gauge galvanized steel with polyester powder finish, suitable for indoor or outdoor installations. Also available in 12 gauge aluminum. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester. High strength arc and track resistant.
Bypass:	Lever operated jaw release. Full 200 ampere bypass capacity. Moving lever up closes bypass and releases pressure on meter terminals. Cover cannot be replaced with lever in bypassed position.
Terminals:	Lay-in type with dome point screw. Conservatively rated at 200 amperes, terminals will accommodate conductors from #1 to 350 MCM copper or aluminum.
Hubs:	Single removable gasketless hub, cover plate or no hub. Hubs and cover plate are interchangeable.
UL:	All units are UL listed for use on loads up to 200 amperes; 600 volts a.c.
Safety Shield:	Polycarbonate track resistant insulating safety shield provides protection from accidental shorts and shocks.
Torque:	Wire connections: 400 in. - lbs.

Connections:

Type HQSU Clamping Jaw Lever Bypass

Common Features

- 200A continuous duty rated
- Silver brazed connections
- 100% rated lever bypass w/clamping action on meter
- 3/8" stud connection - available with bolt -on lugs
- Steel or aluminum construction
- Glass filled polyester block construction
- Track resistant lexan shield
- Plated copper current path
- Ringless style cover

Product Schedule 423

Type HQSU Clamping Jaw Lever Bypass

General Information:

Capacity:	200 ampere - 600 volts a.c.
Application:	4 Jaw: 1 phase, 3 wire, 5 Jaw: 1 or 3 phase, 3 wire, 7 Jaw: 3 phase, 4 wire
Enclosures:	Adequately dimensioned for ease in wiring and constructed of 16 gauge steel with polyester powder coat finish for indoor or outdoor installations. Also available in 12 gauge aluminum upon request. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester plastic. High strength arc and track resistant.
Bypass:	Lever operated - full 200 ampere rating. Moving lever up closes bypass and releases pressure on meter terminals. Cover can not be replaced with lever in bypassed position.
Terminals:	3/8" x 3/4" cold headed cadmium plated steel studs to accommodate various screw type or compression lugs for conductors to 350 MCM. Tin plated copper mounting plate is compatible with aluminum or copper lugs. Type HQ-4SU are 3/8" - 24 x 3/4" plated steel studs to accommodate various screw-type or compression lugs up to single 350 MCM or parallel 250 MCM.
Hubs:	No hub. 1 1/2", 2" and 2 1/2" single removable hub construction. Interchangeable hubs and hub opening cover plates create a "universal" mounting device for both underground and overhead service applications.
UL:	Units with 425/444 prefix are UL listed.
Safety Shield:	Polycarbonate track resistant transparent insulating safety shield provides protection from accidental shorts and shocks.
Torque:	Lug connections: 400 in. - lbs., Wire connections: 300 in. - lbs.

Product Schedule 424

Type HQND 5 Terminal Clamping Jaw Lever Bypass W/Neutral Disconnect

General Information:

Capacity:	200 ampere continuous - 600 volts a.c.
Application:	1 or 3 phase, 3 wire and 3 wire network services using self-contained Class 100 or Class 200 meters (ANSI form 12S). The HQ-5ND and HQ-5NDU devices are specifically designed for 3 phase, 3 wire ungrounded services when it is desirable to open the common phase and remove potential from the load when the meter is removed. The center phase is equipped with a 200 amp sliding clamp disconnect that is operable by a nut and captive Belleville washer.
Enclosures:	Ringless cover. Constructed of 16 gauge galvanized steel with polyester powder coat suitable for indoor or outdoor installation. Also available in 12 gauge aluminum upon request. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester. High strength arc and track resistant.
Bypass:	Lever operated jaw release. Full 200 ampere capacity. Moving lever up closes bypass and releases pressure on meter terminals. Cover cannot be replaced with lever in bypassed position.
Terminals:	Lay-in type with dome point screw. Conservatively rated at 200 amperes, terminals will accommodate conductors from #1 to 350 MCM copper or aluminum.
Hubs:	Single removable gasketless hub, cover plate or no hub. Hubs and cover plate are interchangeable.
UL:	These mounting devices are listed by UL for use on loads up to 200 amp 600 volts a.c.
Safety Shield:	Track resistant polycarbonate insulating safety shield provides protection from accidental shorts and shocks.

Product Schedule 425

Type HQW 4, 5, 7 Terminal Clamping Jaw Lever Bypass

General Information:

Capacity:	200 ampere, 600 volts a.c.
Application:	Single phase, 3 wire, 1, 2 or 3 phase, 3 wire, 3 phase, 4 wire wye or delta
Enclosures:	Outdoor enclosure #16 gauge galvanized steel with polyester powder coat finish.
Block Assembly:	Glass fiber reinforced polyester. High strength arc and track resistant.
Bypass:	Lever-arm bypass with jaw tension release. Cover cannot be closed with lever in bypass position. NOTE: Bypass is not for use as a circuit interrupter.
Terminals:	Stud-type terminals with lay-in or stud-type load terminals. Stud-type terminals are 3/8" - 24, zinc-plated steel studs with Belleville washer nut assemblies for copper or aluminum lugs with up to 1/2" thick mounting tongue. Recommended lugs: Talon numbers 57606, 57606-1, 55890, 55890-1, 58022. Lay-in type terminals with dome point screws are for copper or aluminum wire from #1 AWG to 350 MCM.
UL:	All units are UL listed.
Safety Shield:	Track resistant polycarbonate safety shield provides protection against accidental shorts and shocks.

① All units are UL listed and are equipped with a ground lug.
 ② Bypass is clamp jaw, lever operated and is rated for 100%.

③ 5th Terminal included at 9:00 position.
 ④ 7/16" Barrel Lock KO and Bracket Installed

Product Schedule 426

Type HQ-4S 200A Multi-Position Lever Bypass

General Information:

Capacity:	200 ampere continuous, 310 ampere total ampacity, 600 volts a.c.
Application:	HQ-4, single phase, 3 wire, 4 terminal (convertible to 5 terminal using shield assembly #35815-2 for grounded service only), HQ7, 3 phase, 4 wire.
Enclosures:	All enclosures shown here are ringless NEMA type 3R, 16 gauge painted steel.
Block Assy.:	Block assemblies are arc and track resistant glass fiber reinforced polyester.
Bypass:	Lever operated jaw release. Moving lever up closes bypass and unclamps meter blades. Bypass connection is completed before meter blade is released, thus eliminating meter blade-to-jaw terminal arcing. The cover cannot be replaced with the lever in the bypassed position. Bypass capacity: 200 amperes continuous.
Terminals:	Terminals are 3/8"-24 cold headed, zinc-plated, steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs. The flat washer supplied must be installed directly beneath the Belleville washer.
UL:	All sockets shown are UL approved.
ANSI-C12.7:	All sockets meet or exceed ANSI-C12.7 standards.

Connections:

Product Schedule 428

200A Non-Clamping Lever Bypass Residential/Commercial Type MQ-U

Common Features

- 200A continuous duty rated
- 250A max. rated
- Ground lug available
- Lay-in 350 kcmil lugs
- Steel or aluminum construction
- Glass filled polyester block construction
- 100% rated bypass
- Overhead and underground capabilities
- 600V rated
- Strongest non-clamp jaw block available
- 5th Jaw Assembly Available - Use #H8059864 40605-025

General Information:

Capacity: 200 ampere continuous, 600 volts a.c.
 Application: 1 phase, 3 wire; 3 phase, 4 wire wye or 4 wire delta services using self-contained Class 100 or Class 200 meters.
 Enclosures: Constructed of 16 gauge galvanized steel with polyester powder finish, suitable for indoor or outdoor installation. Also available in aluminum and different sizes upon request. All boxes have ringless covers. All enclosures are NEMA type 3R.
 Block Assembly: Glass fiber reinforced polyester mounted on metal baseplate. High strength, arc and track resistant.
 Bypass: Lever-operated. Moving lever up closes bypass. Cover cannot be replaced with lever in bypassed position. Bypass capacity: 200 amperes continuous.
 Terminals: Lay-in type with dome point screw. Conservatively rated at 200 amperes, terminals will accommodate conductors from #6-350 kcmil copper or aluminum.
 Safety Shield: Track resistant polycarbonate insulating safety shield provides protection from accidental shorts and shocks.
 Hubs: Single, removable, gasketless hub; cover plate, or no hub. Hubs and cover plate are interchangeable.
 UL: These mounting devices are listed by UL for use on continuous loads up to 200 amperes and 600 volts.
 ANSI-C12.7: All sockets meet or exceed ANSI-C12-7 standards.

 ② 56732-1 lugs on line and load side.
 ③ 55890 lugs on line and load side.
 ④ 58022 lugs on line and load side.

⑤ 56732 lugs on line and load side.
 ⑥ Includes ground lug #67554.
 ⑦ UG only design-wire cables straight in, socket has been moved up.
 ⑧ Includes stainless steel latch and hasp.

Product Schedule 430

Type HQST 4-7 Terminal Clamping Jaw Lever Bypass

General Information:	
Capacity:	320 ampere continuous, 400 ampere maximum, when wired to National Electrical Code ampacity; 600 volts a.c.
Application:	4 jaw: 1 phase, 3 wire, 5 jaw: 1 or 3 phase, 3 wire, 7 jaw: 3 phase, 4 wire.
Enclosures:	Constructed of galvanized steel with polyester powder finish. All boxes have a ringless cover. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester plastic. High strength arc and track resistant.
Bypass:	Lever-operated jaw release. Moving lever up closes bypass and unclamps meter blades. Bypass connection is completed before meter blade is released, thus eliminating meter blade to jaw terminal arcing. The cover cannot be replaced with the lever in the bypassed position. Bypass capacity: 320 amperes continuous.
Terminals:	3/8" - 24 cold-headed zinc-plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs. The flat washer supplied must be installed directly beneath the Belleville washer.
Lugs:	Six lugs are required for the HQ-4S mounting device, eight for HQ7S.
UL:	All units are UL listed.
Safety Shield:	Track resistant transparent polycarbonate insulating safety shield provides protection from accidental shorts and shocks.
Anti-Inversion	An optional wire-type jaw insert (#H59676) can be used with HQ-4S to prevent inverted installation of Talon Class 320 single phase meters. The insert rejects normal width terminal blades, yet admits the Talon Class 320 narrower upper right-hand blade.
Insert:	The insert is field-installable but cannot be removed in the field.
Hubs:	Single, removable, gasketless hub, cover plate or hub opening only. Hubs and cover plate are interchangeable.

① 60162 lugs are also rated for (2) 2/0-250 kcmil.
 ② 60162 line lugs, 56732 load side lugs.
 ③ Anti-inversion clip, 59676D, included.
 ④ 58490-1 line lugs and 56732-2 load lugs, 13/32" opening on lugs.

⑤ 56732-2 line and load lugs (13/32" opening).
 ⑥ 56732 line and load lugs (9/16" opening).
 ⑦ 60162 line lugs and 56732M load lugs.
 ⑧ Ground lug included.
 ⑨ HQSW (446 prefix) are not UL listed for OH applications.
 ⑩ 480XX Series - UG only - meter moved up in device.

Product Schedule 431

Type HQSW/T 4-5 Terminal Clamping Jaw Lever Bypass -- Offset Style

General Information:	
Capacity:	320 ampere continuous, 400 ampere maximum, when wired to National Electrical Code ampacity; 600 volts.
Application:	Single phase, 3 wire.
Enclosures:	Constructed of 14 gauge galvanized steel with polyester powder finish. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester plastic. High strength arc and track resistant.
Bypass:	Lever-operated jaw release. Moving lever up closes bypass and unclamps meter. Meter blade to jaw terminal arcing is eliminated. The cover cannot be replaced with lever in bypass position. Bypass capacity: 320 ampere continuous.
Terminals:	3/8" - 24 cold-headed zinc-plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs. Supplied with or without lugs.
Lugs:	Connection lugs are available for use with these mounting devices. Recommended lugs are type #60162, which handle a single conductor up to 600 MCM or two conductors up to 250 MCM. 6 lugs are required.
UL:	Type HQ-4SWT mounting devices are listed by UL for use on loads up to 320 ampere continuous, 600 volts a.c. HQ4SW devices are not listed.
Safety Shield:	Track resistant transparent polycarbonate insulating safety shield and fiber insulating barriers provide protection from accidental shorts and shocks.
Anti-Inversion Insert:	An optional wire-type jaw insert (#H59676) can be used with HQ-4S to prevent inverted installation of Talon Class 320 single phase meters. The insert rejects normal width terminal blades, yet admits the Talon Class 320 narrower upper right-hand blade. The insert is field-installable but cannot be removed in the field.
Hubs:	Single, removable, gasketless hub, cover plate or no hub. Hubs and cover plate are interchangeable.

Product Schedule 435

Type HQD 4-7 Terminal Clamping Jaw Lever Bypass

Common Features

- 320A continuous duty rated
- Silver-brazed connections
- 100% rated lever bypass w/clamping action on meter
- Factory installed lugs or 1/2" stud connection
- Steel or aluminum construction
- Heavy duty glass-filled polyester block construction
- Track-resistant lexan shield
- Plated copper current path

 ② 5th jaw at 6:00 position.

③ Ground lug included.
 ④ 60162 line side lugs, 56732 load side lugs.

⑤ Can be used 3-Ph 3-W application.

Product Schedule 435

Type HQD 4-7 Terminal Clamping Jaw Lever Bypass

General Information:	
Capacity:	320 ampere continuous, 400 ampere maximum, when wired to National Electrical Code ampacity: 600 volts.
Application:	HQ-4D: 1 phase, 3 wire; HQ-5D: 1, or 3 phase, 3 wire grounded or ungrounded; HQ-7D: 3 phase, 4 wire wye or 4 wire delta.
Enclosures:	Constructed of 14 gauge galvanized steel with polyester powder finish. Also available in 28" H x 16" W aluminum box or in 31-1/2" H x 18" W steel box upon request. When ordering specify "same as Cat. # 477xx-xx except..." All boxes have ringless cover. All enclosures are NEMA type 3R.
Block Assembly:	Glass fiber reinforced polyester plastic. High strength arc and track resistant.
Bypass:	Lever-operated jaw release. Moving lever up closes bypass and unclamps meter. Meter blade to jaw terminal arcing is eliminated. The cover cannot be replaced with lever in bypassed position. Bypass capacity: 320 ampere continuous.
Terminals:	1/2" cold-headed zinc-plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs. Supplied without lugs.
Lugs:	Connection lugs are available for use with these mounting devices. Recommended lugs are type #60162, which handle single conductor up to 600 MCM or two conductors up to 250 MCM.
UL:	HQ-4D, HQ-5D and HQ-7D mounting devices are listed by UL for use on loads up to 320 ampere continuous, 600 volts a.c.
Safety Shield:	Track resistant transparent polycarbonate insulating safety shield and fiber insulating barriers provide protection from accidental shorts and shocks.
Anti-Inversion Insert:	An optional wire-type jaw insert (#H59676) can be used with HQ-4S to prevent inverted installation of Talon Class 320 single phase meters. The insert rejects normal width terminal blades, yet admits the Talon Class 320 narrower upper right-hand blade. The insert is field-installable but cannot be removed in the field.
Hubs:	Single, removable, gasketless hub, cover plate or no hub. Hubs and cover plate are interchangeable.

① 60162 lugs are also rated for (2) 2/0-250 kcmil.
 ② 60162 line lugs, 56732-1 load side lugs.
 ③ Anti-inversion clip, 59676D, included.

④ 56476 line lugs, 60162 line neutral lug.
 ⑤ 60162 line lugs, 56490 load lugs.
 ⑥ UG only - interior moved up.

⑦ Offset design - no bussing. HQS block.
 ⑧ Ground lug included.
 ⑨ Can be used for 3-Ph 3-W applications.

Product Schedule 437

Type HQDSW/SWD 4-7 Terminal Clamping Jaw Lever Bypass

General Information:	
Capacity:	320 ampere continuous, 400 ampere maximum, when wired to National Electrical Code ampacity; 600 volts.
Application:	HQ-4D/SW: 1 phase, 3 wire; HQ-5D/SW: 1, 2 or 3 phase, 3 wire grounded or ungrounded; HQ-7D/SW: 3 phase, 4 wire wye or delta.
Enclosures:	Constructed of 14 gauge galvanized steel with polyester powder finish. All boxes have a ringless cover. All enclosures are NEMA type 3R.
Bypass:	Lever-operated jaw release. Moving lever up closes bypass and unclamps meter blades. Meter blade to jaw terminal arcing is eliminated. The cover cannot be replaced with lever in bypassed position. Bypass capacity: 320 ampere continuous.
Terminals:	3/8" or 1/2" cold-headed zinc-plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs. Supplied without lugs unless otherwise indicated.
Lugs:	Connection lugs are available for use with these mounting devices.
UL:	HQ-4D/SW, HQ-5D/SW and HQ-7D/SW mounting devices are listed by UL for use on underground feed services with loads up to 320 amps continuous, 600 volts a.c. Units supplied with hubs are not UL labeled..
Safety Shield:	Track resistant transparent polycarbonate insulating safety shield and insulating barriers provides protection from accidental shorts and shocks.
Anti-Inversion Insert:	An optional wire-type jaw insert (#H59676) can be used with HQ-4S to prevent inverted installation of Talon Class 320 single phase meters. The insert rejects normal width terminal blades, yet admits the Talon Class 320 narrower upper right-hand blade. The insert is field-installable but cannot be removed in the field.

Product Schedule 440

Type K4 400/480A Bolt-In Meter Mounting Equipment

Common Features

- 400A and 480A continuous duty models available
- Heavy duty construction using 1/2" plated bolts
- Rake-type bypass available
- Factory installed lugs or 1/2" stud connection
- Steel or aluminum construction
- Polycarbonate safety shield available
- Non-UL listed units (due to wire bend)
- Plated copper current path

Consult the factory for other available options such as, but not limited to alternate hasp material, aluminum enclosures and special labeling.

① Ground lug included.

② Closure plate included.

③ Device has neutral bar in place of stud.

④ Special K.O. config. Back K.O. 2, 2, 5, 3.

⑤ Special K.O. config. Back K.O. 2, 5, 3, 3, 5.

⑥ Special K.O. config. No K.O.s on side or back.

⑦ Lug extender installed - line side.

⑧ Cover includes hazardous voltage label.

⑨ "Residential Use" ink stamp.

Product Schedule 440

Type K4 400/480A Bolt-In Meter Mounting Equipment

General Information:

Capacity: 400 amperes continuous - 300 volts a.c.
 Application: For use with 3 wire single phase self-contained Type MS-K watt/hour meters.
 Enclosures: Constructed of 14 gauge galvanized steel suitable for indoor or outdoor installations. All enclosures are NEMA type 3R.
 Bypass: Separate manual type #H56495.
 Terminals: 1/2" - 20 steel studs with nuts and captive Belleville washers to accommodate various pressure-type lugs for conductors from #6 to 800 KCMIL.
 Blocks: Glass fiber reinforced polyester plastic. High strength arc and track resistant.
 Meter: Two position stud type. One set of studs provides out-of-service storage. The in-service studs are positioned so the meter cannot be installed upside-down.
 Mounting: Cannot be installed upside-down.
 UL: Devices on this schedule are not UL listed due to wire bend requirements.

① 2 ground lugs included.

② Device has neutral bar with (2) studs.

③ Lug extender (59299) installed on line side.

④ Ground lug included.

⑤ Safety shield installed.

⑥ Includes 7/8" barrel lock K.O. and bracket

⑦ Bypass not included.

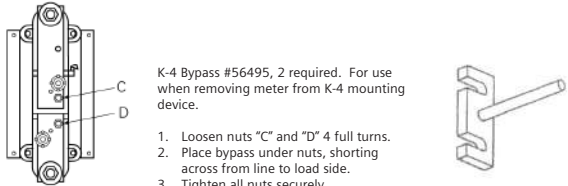

Product Schedule 443

Type K4UT 400/480A Bolt-In Meter Mounting Equipment

General Information:

Capacity:	400 or 480 ampere continuous, 300 volts a.c.
Application:	For use with 3 wire single phase.
Enclosures:	Constructed of 14 gauge G90 steel suitable for indoor or outdoor installation. All enclosures are NEMA type 3R.
Bypass:	Separate manual type #H56495.
Blocks:	Glass fiber reinforced polyester plastic. High strength, arc and track resistant.
Terminals:	1/2" cold headed cadmium plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs for conductors from #6 to 800 KCML.
Hubs:	No hub. 3", 3-1/2", 4" removable type.
UL:	Type K-4UT devices are UL listed.

K-Base Bypasses:

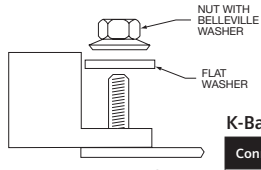

K-4 Block Assembly

K-4 Bypass #56495, 2 required. For use when removing meter from K-4 mounting device.

1. Loosen nuts "C" and "D" 4 full turns.
2. Place bypass under nuts, shorting across from line to load side.
3. Tighten all nuts securely.

K-4 Bypass H56495

① Ground lug included.
 ② Closure plate included.
 ③ Special K.O. config.: 1 K.O. on bottom 2.5" - 4".

④ "Residential Use" ink stamp.
 ⑤ Installed jumper for center phase for UG use.
 ⑥ 3 phase, 3 wire or 1 phase 3 wire applications only.

⑦ Unit is UL listed for UG use only.
 ⑧ Bypass not included.

Product Schedule 447

Type K7 400/600A Bolt-In Meter Mounting Equipment

General Information:

Capacity: 400 amperes continuous at 600 volts a.c.
 Application: For use with self-contained Type MT-K watt/hour meters on 3 phase, 4 wire wye and 4 wire delta services.
 Enclosures: Constructed of 14 gauge galvanized steel suitable for indoor or outdoor installations. Ringless cover. Aluminum enclosure available. Consult factory. All enclosures are NEMA type 3R.
 Bypass: Separate manual type (H58888). Three required, 400 ampere bypass capacity.
 Blocks: Glass fiber reinforced polyester plastic. High strength, arc and track resistant.
 Terminals: 1/2" - 20 plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs for conductors from #6 to 800 KCM Cu or Al. Use 3/4" insulated wrench to fasten connectors to block (#55598).
 Meter Mounting: The meter is mounted on six studs using 5/16" - 24 studs with nuts with captive Belleville washers. The three upper studs are positioned so that the meter cannot be installed upside down. Use 1/2" insulated wrench (#55585). Another set of studs provides out-of-service storage. With the meter in this position the slide plate in the box cover can be reversed so the cover can be reinstalled with the words "out of service" showing.
 UL: Type K-7 and K-7T are UL listed.

Product Schedule 448

Type K7T/K7SW 400/480A Bolt-In Meter Mounting Equipment

Common Features

- 400A and 480A continuous duty models available
- Heavy duty construction using 1/2" plated bolts
- Rake-type and rotary bypass available
- Factory installed lugs or 1/2" stud connection
- Steel or aluminum construction
- Polycarbonate safety shield available
- All units are UL listed
- Plated copper current path

9817-9504

Consult the factory for other available options such as, but not limited to alternate hasp material, aluminum enclosures and special labeling. Note: All K7T and K7SW are U.L. listed for OH and UG use. Installed lugs are intended for dedicated OH or UG applications. Please ensure lug listing complies with application requirements. Remove lugs if necessary to obtain proper configuration for needed application.

① Ground lug included.

② Polycarbonate safety shield installed.

③ 7/8" barrel lock K.O. and bracket included.

④ 2 hub openings-(1) 3.5" hub inst. and 1 CL plate inst.

⑤ 5 terminal for 3 phase, 3 wire or 1 phase 3 wire services only.

⑥ Indicates what bypass, if any, is installed. If no bypass use 69623 or 58888.

⑦ Lug extender installed - line side.

⑧ Cover includes hazardous voltage label.

⑨ "Residential Use" ink stamp.

Product Schedule 448

Type K7T/K7SW 400/480A Bolt-In Meter Mounting Equipment

General Information:

Capacity: 400 amperes continuous, 480 amperes continuous/480 amperes maximum - 600 volts a.c.
Application: For use with 3 or 4 wire, single phase and polyphase self-contained, Type K watt/hour meters.
Enclosures: Constructed of 14 gauge galvanized steel suitable for indoor or outdoor installations. Aluminum enclosures also available-contact factory. All enclosures are NEMA type 3R.
Bypass: Separate manual type (2 required for K-5, 3 required for K-7) or rotating link. Both types have 100% bypass capacity.
Blocks: Glass fiber reinforced polyester plastic. High strength, arc and track resistant.
Terminals: 1/2" - 20 plated steel studs with nuts and captive Belleville washers to accommodate various pressure type lugs for conductors from #6 to 800 MCM Cu or Al. Require 3/4" socket wrench.
Meter Mounting: Stud type 5/16 - 24. 1/2" wrench required. Studs are positioned so the meter cannot be installed upside down.
UL: Type K-7 and K-7T are UL listed except as restricted by NEC wire-bending requirements. Both types may be wired for under ground feed using parallel conductors on the line side. Type K-7T may also be wired using overhead feed with parallel conductors on the line side. All devices require parallel wiring on the load side for UL listing. Type K-7 devices are U.L. listed for up to 600 amperes capacity when wired to NEC capacity.

K-Base Bypasses:

Instructions for installing and operating K-7 rotating link bypass #69623

To install bypass:

- Remove the 3 nuts "A" from the studs extending from the 3 bypass bars.
- Assure that bypass feet are vertically positioned in relation to the bypass handle as shown and the 3 handle screws are tight enough so that bypass feet do not turn.
- Install bypass assembly with the handle screws toward the top edge of the bypass handle as shown. Slide the 3 bypass feet over the exposed studs, through the holes in the bypass feet.
- Loosen the 3 handle screws approximately 1/8 turn using a small standard-tip screwdriver.
- Re-install nuts "A" and tighten securely so that bypass feet are in the vertical, non-bypassed position.

To operate bypass:

- Loosen the 3 nuts "A" located on the 3 bypass bars, 1 full turn.
- Loosen the 3 nuts "B" located on the line side current connectors, 4 full turns.
- Slide the bypass handle from right to left, until the curved slots in the bypass feet rest against the studs on the current connectors.
- Securely tighten all 6 nuts "A" and "B", while ensuring the bypass feet remain resting against the connector studs.

K-7 Bypass #58888, 3 required. For use when removing meter from K-7 mounting device.

- Loosen nuts "A" and "B" 4 full turns.
- Place bypass under nuts, shorting across from current connectors to bypass bars.
- Tighten all nuts securely.

General Information:

- Capacity: 20 amperes, 600 volts a.c.
- Application: Transformer-rated applications. Available with or without test switch and pre-wiring.
- Enclosures: 14-gauge .063 aluminum or 16-gauge galvanized steel suitable for indoor or outdoor installation.
- Terminals: Set screw type .
- Hubs: Interchangeable 1", 1-1/4", 1-1/2"
- Finish: Aluminum unpainted unless specified. Steel enclosures have gray polyester powder coat finish.
- Test Switches: Standard 6 and 10 pole, 480-volt rated switches are available from stock. Special switches available upon request.

Product Schedule 467

Type HQ-T Transformer-Rated Meter Mounting Equipment

Common Features

- Clamping jaw lever bypass
- 80A continuous rated
- Ground lug available
- Screw type terminals with pressure plate
- Steel or aluminum construction
- Glass filled polyester block construction
- 200% rated bypass
- Overhead and underground capabilities
- 600V rated

General Information:

Capacity: 80 ampere continuous, 600 volts a.c.

Application: 6 terminal, single phase 2 or 3 wire; 8 terminal 2 or 3 phase, 3 wire, HQ-13T - 3 phase, 4 wire wye or 4 wire delta. For use with transformer-rated Class 10 or 20 meters. May also be used on self-contained applications up to 80 ampere load.

Enclosures: Constructed of 16 gauge galvanized steel with polyester powder coat finish. Also available in 12 gauge aluminum upon request. All enclosures are NEMA type 3R.

Block Assembly: Glass fiber reinforced polyester. High strength, arc and track resistant.

Bypass: Lever-Operated Jaw Release - Moving lever up closes bypass, providing positive short circuiting of the current circuits and releases jaw pressure on the meter current terminals providing easy removal of the meter. Also available is a removable bypass handle which allows a solid cover, #37943-2 for HQ-T or #54199-2 for HQ-TS, to be placed on the box with the bypass closed when it is necessary to remove the meter for in-shop repair or testing. Bypass capacity: 80 amp continuous.

Terminals: Set screw type with pressure plate. Current terminals will accommodate conductors from #4 to #14. Potential terminals will accommodate from #8 to #14.

Hubs: Cover plate or single removable gasketless hubs are interchangeable.

UL: All sockets shown are UL approved.

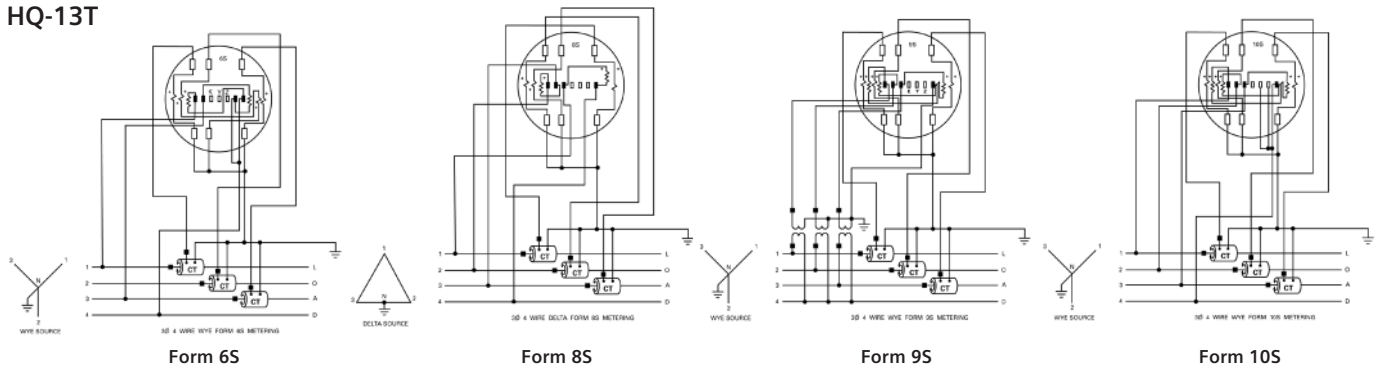

Safety Shield: Track resistant polycarbonate transparent safety shield provides liberal insulation between potential jaws and terminals and protection from accidental shorts and shocks.

General Information:

Capacity: 80 ampere continuous, 600 volts a.c.
 Application: HQ-6TS - Single phase, 2 or 3 wire, HQ-8TS - 2 or 3 phase, 3 wire
 HQ-13TS - 3 phase, 4 wire wye or 4 wire delta
 For use with transformer-rated Class 10 or Class 20 meters and appropriate meter test switch.
 Enclosures: Ringless. Constructed of 16 gauge galvanized steel with baked enamel finish for indoor or outdoor installation. Also available in 12 gauge aluminum upon request. Box is adequately dimensioned and has mounting holes provided for test switch installation. All enclosures are NEMA type 3R.
 Block Assembly: Glass fiber reinforced polyester. High strength, arc and track resistant.
 Bypass: Jaw release type. Moving lever up closes bypass providing positive short circuiting of the current circuits and releases jaw pressure on the meter current terminals providing easy removal of the meter. Also available is a removable bypass handle which allows a solid cover (#54199-2) to be placed on the box with the bypass closed when it is necessary to remove the meter for in-shop repair or testing. Bypass capacity: 80 amp continuous.
 Terminals: Set screw type with pressure plate. Current terminals will accommodate conductors from #4 to #14 copper or aluminum. Potential terminals will accommodate conductors from #8 to #14 copper or aluminum.
 Hubs: Available with cover plate or single removable gasketless hub. Hubs and cover plate are interchangeable.
 UL: All sockets shown are UL approved.

Product Schedule 469

Type HQ-TS Transformer-Rated With Test Switch Provision

General Information (continued):

- Safety Shield:** Track resistant polycarbonate transparent insulating safety shield provides protection from accidental shorts and shocks. Potential terminals are mounted in the safety shield for ease of wiring and testing.
- Test Switch Mounting:** An insulated mounting bracket is included below the meter socket for the customer installation of a standard test switch. Holes are provided for No. 10-32 mounting screws.
- Knockouts:** All box enclosures have one 1", 1 1/4", 1 1/2" concentric knockout in the back, and three 1", 1 1/4", 1 1/2" concentric knockouts in the bottom. There are no knockouts in the sides. In addition, there are one 1/4" knockout and one 1/2", 3/4" concentric knockout in the bottom.

200/320A 4-7 Terminal Pedestal And Breaker Combination

Common Features

- 200A and 320A continuous duty models available
- Factory installed lugs or studs
- Ground lug on all devices
- Horn or lever bypass (uses HQ lever bypass)
- Extension kits available for pedestals
- Breaker devices with provisions or installed breaker
- Pole mount units with breakers available
- Direct burial or pad mount capability

Product Schedule 480

200/320A 4-7 Terminal Pedestal And Breaker Combination

General Information:	
Capacity:	HQ-4SP, HQ-5P, HW-7P: 200 and 320 amperes continuous, 600 volts a.c. UAB: 100 and 200 amperes continuous, 600 volts a.c. UAP: 200 amperes continuous, 600 volts, a.c.
Application:	HQ-4SP, HQ-5P, HQ-7P: 3 phase, 4 wire wye or delta (7 terminal); 2 phase, 3 wire wye or delta (5 terminal). Single phase 3 wire 320 amp (4 terminal) for underground service. UAB: Single phase, 3 wire (4 terminal) for overhead service. UAP: Single phase, 3 wire (4 terminal) for underground service.
Enclosures:	HQ-4SP, HQ-5P, HQ-7P: and UAP: NEMA Type 3R ringless, 16 gauge polyester painted G-90 steel above ground, G-210 steel below grade level. UAB: NEMA Type 3R, ringless, 16 gauge polyester painted G-90 steel.
Block Assembly:	HQ-4SP, HQ-5P, HQ-7P: Standard Type HQ block with glass filled polyester base. UAB: Standard Type A residential block with strong, arc and track resistant, glass-filled polyester base. UAP: Standard Type A residential block with strong, arc and track resistant, phenolic base.
Terminals:	HQ-4SP, HQ-5P, HQ-7P: Lay-in style tin-plated copper on load side; 3/8" studs on line side. UAB and UAP: Lay-in style tin-plated extruded aluminum.
UL:	All sockets shown are UL approved.
ANSI C-12.7:	All sockets meet or exceed ANSI C-12.7 standards.

Air Conditioning Disconnects

Fused and Non-fused

Features:

Flexibility

- 30-60 amperes
- 240 volts A.C.
- Padlock provisions
- Horsepower rated
- 10,000 A.I.C.
- New models available with internal GFCI receptacle
- Removable door
- Ample wiring space

Rugged Durability

- Noryl® thermoplastic and powder coated G90 steel enclosures are corrosion resistant and extremely durable giving long maintenance free service
- Copper conductors
- Raised mounting embosses

Steel AC Disconnects

Ampere rating	Disconnect Type	Catalog Number	Horse power Rating	Dimensions (inches)		
				H	W	D
30	Fused pullout	LF2030	3	7.3	5.0	2.1
60	Fused pullout	LF2060	10	8.0	5.0	2.1
60	Non-fused pullout	LN2060	10	7.3	5.0	2.1
60	Non-automatic switch	LNAS2060	10	7.3	5.0	2.1

Plastic AC Disconnects

Spa Panels

For use as spa/hot tub service disconnect

Features:

- UL Listed
- Factory installed, 2-pole 50A or 60A GFCI breaker for 240V ground fault protection
- NEMA Type 3R outdoor enclosure
- 2 extra spaces (4 circuits maximum) for additional circuit breakers
- 125 Amp rated interior
- Factory installed 5 position ground bar
- Closure plate included
- Compact enclosure size
- Convenient standard package of 1
- Uses reliable Siemens circuit breakers

Amperage	Catalog Number	Receptacle Provision
30	LGP3S	TT130
50	LGP1S	L1450R

TL Series Temporary Power Outlet Panels

Metered Devices

Surface Mount Type

Features

- 125 ampere rating (125A MLO, 100A MB)
- 350 kcmil line side lugs
- Ring or ringless style covers
- Horn or lever bypass options
- Top and bottom feed options
- Factory installed light kit
- Factory installed photocell
- Stainless steel latch and hasp
- Easy to open and close receptacle cover
- Pole-mounted water and CATV/phone kits
- High quality Siemens loadcenter interior and breakers

Pedestal Mount Types

Features

- 125 ampere rating (125A MLO, 100A MB)
- Ring or ringless style covers
- Single and back-to-back configurations
- 350 kcmil loopfeed lugs (back connected)
- Horn bypass option
- Direct burial and pad mount options
- Factory installed light kit
- Factory installed photocell
- Stainless steel latch and hasp
- Easy to open and close receptacle cover
- Pole-mounted water and CATV/phone kits
- High quality Siemens loadcenter interior and breakers

TL Series Temporary Power Outlet Panels

Un-Metered Devices

Features

- 125 ampere rating (125A MLO, 100A MB)
- Loop feed models available
- Factory installed light kit
- Factory installed photocell
- Easy to open and close receptacle cover
- Slim design for 2 receptacle devices (7" wide)
- High quality Siemens loadcenter interior and breakers

Pad Mount

Direct Burial

Features

- 125 ampere rating (125A MLO, 100A MB)
- 350 kcmil loopfeed lugs (back connected)
- Single or back-to-back configurations
- Direct burial or pad mount options
- Factory installed light kit
- Factory installed photocell
- Easy to open and close receptacle cover
- Externally attached water and CATV/phone kits
- High quality Siemens loadcenter interior and breakers

9F		Designates GFCI Circuit Breaker Protection		

Meter/Bypass

U	Unmetered
R	Ringless, No Bypass
N	Ring, No Bypass
L*	Ringless, Lever Bypass
H	Ringless, Horn Bypass

*Lever bypass available only in surface mount, topfeed configurations

Enclosure Type

S	Surface mount, un-metered
S2 ^⑤	Surface mount, un-metered, loop feed lugs
T	surface mount, top feed-metered
B	surface mount, bottom feed-metered
P	Direct burial pedestal
M	Pad mount pedestal
2P	Direct burial pedestal, double-sided
2M	Pad mount pedestal, double sided

Custom Options^②

L ^⑥	Light kit factory installed
LP ^⑥	Light kit with photocell factory installed
X ^⑥	Alternate receptacle configuration on double-sided pedestal
Cx	Custom color configuration
F	Florida Meter Group Approved

Custom Color Guidelines:

- "Cx" designates custom color. Contact sales office for color code to insert into part number to replace the "x" in this designation.
- Additional charges apply and depend on the color needed.
- Custom color matching available: Customer must signoff on painted sample prior to production of order.
- Order cancellations will involve a fee after custom paint is ordered.

Example: Catalog Number: TL1F37NT-LP

<p>Given specifications:</p> <ul style="list-style-type: none"> • 125A Main Lugs • 50A, 125/250V receptacle with GFCI circuit breaker • 30A, 125V receptacle with a standard circuit breaker • 20A, 125V GFCI weather resistant receptacle • Ring type meter at the top • Pedestal mount device • Light option with photocell 	<p>Step 1 Start with the power receptacle product line prefix identifier and choose the main type: (TL)</p> <p>Step 2 Choose the first receptacle and its circuit breaker type: (1F)</p> <p>Step 3 Choose the second receptacle and its circuit breaker type: (3)</p> <p>Step 4 Choose the third receptacle and its circuit breaker type: (7)</p> <p>Step 5 Choose utility meter & bypass type required: (N)</p> <p>Step 6 Choose enclosure type: (T)</p> <p>Step 7 Add dash and select light option with photocell: (-LP)</p>

Special Accessories

Catalog Number	Description	Notes
TLAWATER ③	Water Connection Accessory	Accessories are intended to mount on each side of a direct burial or pad mount pedestal. These accessories can be used independently provided they are mounted on a flat surface. Mounting these accessories to round poles is not recommended.
TLATVP	Television & Phone Connection Accessory	
TLALFB	Loopfeed Replacement Block	Includes (1) assembly. Replacement only.
TLA0816LG	Replacement interior for 10" wide devices	Replacement Only
TLAMS200	TL Series Meter Socket	Replacement Only
TLABULB	TL Series Light Bulb	Replacement Only
TLAPC120V	TL Series Photocell	Replacement Only

① Stocked item. Status subject to change without notice.

② NEMA receptacle configurations listed.

③ Accessory consists of trough only. User must install pipe and water connection point.

Connector Lugs

Pressure type lugs for Talon's stud type meter mounting devices are made of 6061-T6 aluminum to provide high strength and high conductivity. All lugs are tin-plated to ensure low contact resistance and to reduce corrosion.

Allen or hex head pressure screws are furnished to provide excellent conductor spread for maximum binding action with the lug. All Talon lugs are listed with Underwriters Laboratories.

① Conversion kits are for use in anchor 200A lever bypass units. Self contained enclosures only.

Product Schedule 500

Terms of Sale, Meter Mounting Device Applications

Terms of Sale

Transportation Charges: Prices listed are F.O.B. factory with freight prepaid and allowed on all shipments of orders of \$1,000 net or more for single shipments to one location.

Minimum Billing: \$400 net plus transportation charges.

Cancellation: Orders accepted by the factory can be cancelled only with the factory's consent and upon payment to the seller of reasonable charges incurred by the seller which will indemnify the seller against loss.

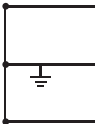

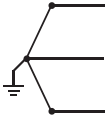

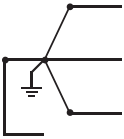

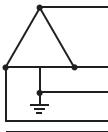

Returns: Goods may not be returned to Talon without written authorization from the factory. A minimum 20% restocking charge will be applicable on all returned goods. Credit will be given only for current production items in unopened cartons. All transportation charges paid by Talon will be deducted from such credit.

Terms: Standard/Stock Products:

2% 10th net 25th for invoices dated the 1st through the 15th of the month.

2% 25th net 10th for invoices dated the 16th through the 31st of the month.

Energization of Electrical Equipment

Important Information for Installers

Important Note

In addition to national and local electrical codes, many utilities have specific requirements for metering equipment. Always consult the serving utility for their specifications and requirements prior to ordering or installing meter mounting equipment.

Before Energizing

- A. Give equipment a thorough visual examination to determine that:
 - 1) No shipping or installation damage exists.
 - 2) Proper clearances have been maintained.
 - 3) All connections have been made.
 - 4) Equipment is clean and dry.
- B. Make a thorough examination to:
 - 1) Verify tightness of all bolted connections (see table below).
 - 2) Manually operate all circuit breakers, switches, relays, etc.
 - 3) Check rigidity of all mountings, bus bars and components.
 - 4) Use test equipment to check continuity of circuitry and integrity of insulation.
- C. All switches and circuit breakers should be in the "off" position.
- D. Verify that manual meter bypass (if applicable) is in non-bypass position.
- E. Install cover and/or close doors.
- F. If installation is not being energized at this time, follow "after-energizing" steps listed below. These steps will secure the installation in case of accidental energization.

When Energizing

- A. Use caution and follow established safety procedures:
 - 1) Wear safety apparel.
 - 2) Use safety equipment.
 - 3) Take action to prevent injury to yourself and others in the event of failure of the installation.
 - 4) Take action to prevent/decrease damage to property in the event of failure of the installation.
 - 5) If you are unsure how to safely energize the installation, get someone who is knowledgeable to do it.

After Energizing

- A. Secure the installation:
 - 1) To prevent accidental contact with energized parts, cover all openings with approved filler devices.
 - 2) To prevent unauthorized access, secure all covers and/or doors with approved security devices.
 - 3) Attach/post information to advise others of potential hazards associated with the installation.

Materials & Finishes

Reference Information

Materials

Steel Quality

The meter equipment listed in this catalog is made of galvanized steel (AISI* G90) to afford the best possible weather proofing.

*American Iron and Steel Institute.

Steel Sheet

16 gauge, galvanized, sheet: 1 1/4 oz./ sq.ft. class zinc-coated. (AISI G90).

14 gauge, galvanized, sheet: 1 1/4 oz./ sq.ft. class zinc-coated.

Aluminum Extrusion

Wire-Terminals: Alloy; 6061-T6, Tin-plated for Cu/Al wire.

Bus Bar: Alloy; 6101-O & 6063-O.

Aluminum Sheet

3000 series aluminum sheet, H14, or 5052 series aluminum sheet, H32. Where applicable thicknesses range from .064–.125.

Copper Sheet & Bus

Electrolytic copper with tin plating in most applications.

Insulating Materials

- In most units, support bases for current-carrying components are molded from fiberglass reinforced high-strength, track resistant, thermoset polyester molding compounds.
- Clear or black safety shields and polarity barriers are molded from high-strength, track resistant, polycarbonate molding compounds.
- Various sheet insulating materials, as appropriate for the application are utilized in the fabrication of flat, formed and punched component parts and barriers.

Finish

Process

ANSI 61 grey state-of-the-art electrostatically applied powder paint offers a durable, non-fading finish. For further information concerning the chemical analysis of the weather resistant finish, please contact the factory.

Metal Fastners

Zinc-coated with a chromate dip.
